

2021 Pavement Management Project

May 10, 2021

Project Summary

This year's Pavement Management Project in Falcon Heights is shown in the map below.

Work on the project involves mill and overlay of the bituminous surface of the streets, sidewalk repairs, ADA updates to pedestrian ramps, and replacement of damaged curb and gutter. An infiltration basin will be installed at the north end of Lindig Street to improve surface water quality and quantity. Minor storm and sanitary repairs are also included.

Project Approval & Funding

The Council accepted the Feasibility Report on the project on September 23, 2020, and held a public hearing on October 28, 2020. On February 10, 2021, the Council awarded the 2021 PMP contractor to Molnau Trucking.

The cost to perform this pavement maintenance is funded by a combination of City funds, Municipal State Aid funds (Gas Tax) and Special Assessments. Utility repairs are funded using utility funds. A Special Assessment Hearing will be held this fall for Council to approve the finalized assessment roll.

Schedule

The contractor's schedule is shown below. Please note, weather will be a factor and the schedule will likely change as the season progresses. We will send out additional newsletters as the contractor is moving to the next phase of their construction.

May 17	Lindig St., Tatum St., and Lindig infiltration basin
Early June	Fry St., St Marys Street, East and West Snelling Dr.
Mid-June	Asbury St., Arona St., Simpson St., Ruggles St., Pascal St., Crawford Ave., Albert St.
Mid-July	Complete restoration

We will send newsletters to update the schedule, but we recommend that residents check the City website for more frequent updates.

Private Utilities

Xcel Energy has notified the City that they will replace existing gas lines in several of the project streets this summer, starting in June. Their work will take place on the following project streets: Tatum St, Lindig St., St Marys St. and West Snelling Drive.

Private Systems in the Right of Way

Curbs designated for repair will be marked ahead of the project. Private systems such as sprinklers or invisible fences near curb repairs will be affected. Please notify Dan Turner,

Project Coordinator, immediately if you have an underground sprinkler system or an invisible fence in the boulevard. He will be able to determine if you

need to move it out of the way before construction starts.

Necessary removal and repairs are the responsibility of the property owner.

Access

The Contractor is required to keep the roads passable and to provide driveway access whenever possible. The construction project will be staged so that residents and emergency vehicles will be able to drive on the streets at all times. If you have special access needs, please let us know.

Mail Delivery & Garbage Pick up

The contractor may need to install temporary mail boxes during the project. You will be notified if temporary mailboxes need to be installed for your home. Schedules and times of mail delivery and garbage pickup should remain unchanged.

Survey Markers

To perform the project construction, engineers place a series of survey markers for the contractor to measure from. Typically, these markers are offset several feet from the object or point they refer to so that they are not disturbed during the construction process. As a result, these offset markers are often placed well into a resident's yard. Please notify Dan Turner, Project Coordinator, of any stakes that have been moved accidentally.

Utility Flags

To protect against underground utility damage, the contractor will be calling in utility locates. This is required by anyone digging a hole whether it is for planting a tree or removing curb. Xcel Energy, Comcast and CenturyLink will locate their underground utilities by spray painting and placing flags in the boulevard.

You'll know what's below by the different flags, stakes or paint.

-  **Red** - Electric
-  **Yellow** - Gas, oil or petroleum
-  **Orange** - Communications
-  **Blue** - Potable water
-  **Purple** - Reclaimed water, irrigation
-  **Green** - Sewer
-  **White** - Proposed excavation
-  **Pink** - Temporary survey

Construction Site Safety

We remind you to use caution around the work site. Your assistance in reminding children to stay clear of construction equipment is helpful in maintaining a safe environment. Your patience and cooperation during this construction is appreciated. Please use extreme caution walking, biking or driving in and around construction areas. The large equipment may make it hard to see or hear you.

Contact Us!

If you have any questions, concerns, or comments please contact us at 651-792-7004 between 8 am and 4:30 pm.

Throughout the project, we will keep you informed through monthly direct mailings and weekly updates on the project website.

To receive notifications of website updates and other project related news, sign up for the Falcon Heights Pavement Management Project "Notify Me" List.

After Hours

If an issue arises outside of regular business hours, contact the City's 24-hour non-emergency number at 651-767-0640.

ALWAYS CALL 911 FOR EMERGENCIES.
