SAMPLE

Part One Crime Total

- Part One Crime Total
- Part One Crime Average (1772.92)
- Linear (Part One Crime Total)

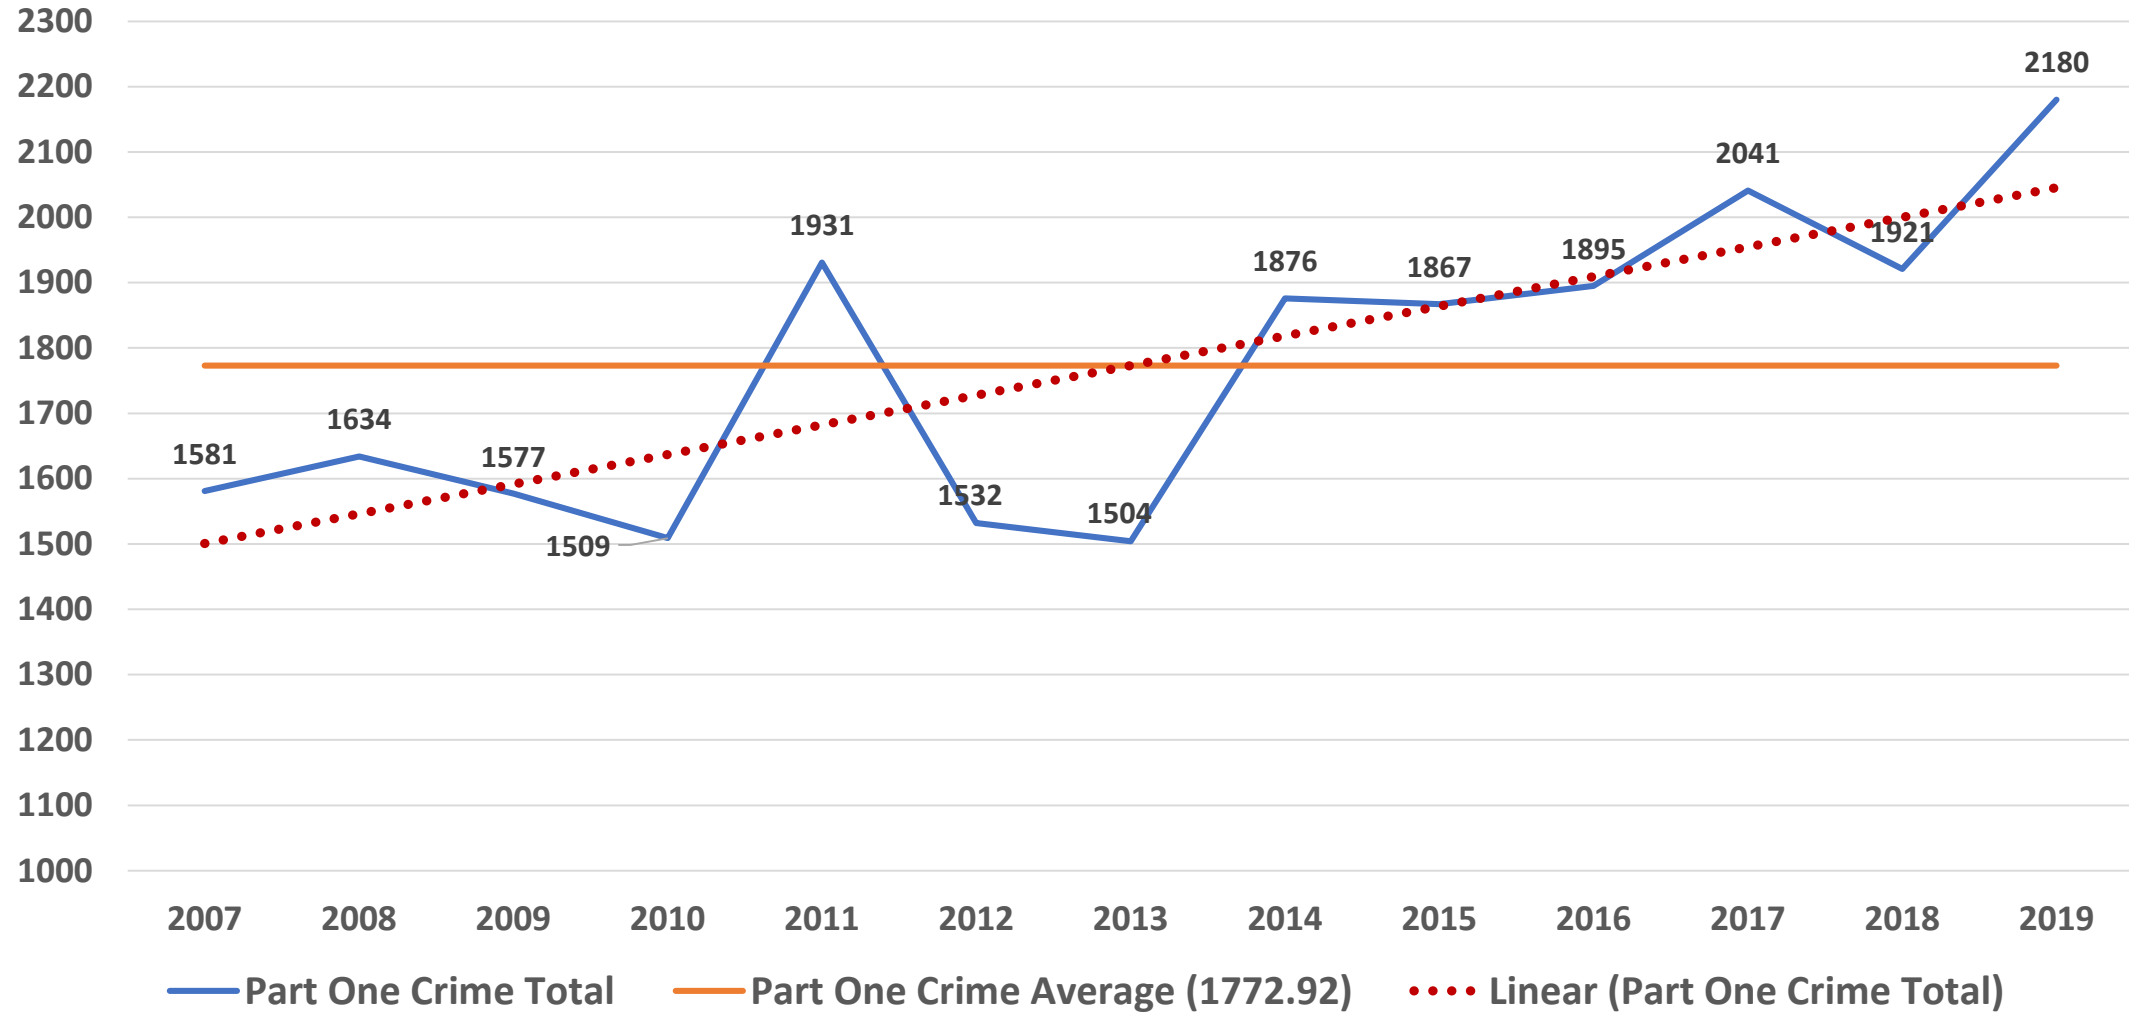

Linear Trendline suggests if crime is increasing, decreasing, or staying the same. In this example, Part One Crime is trending upward (increasing) with time.

Actual Number of Incidents per year

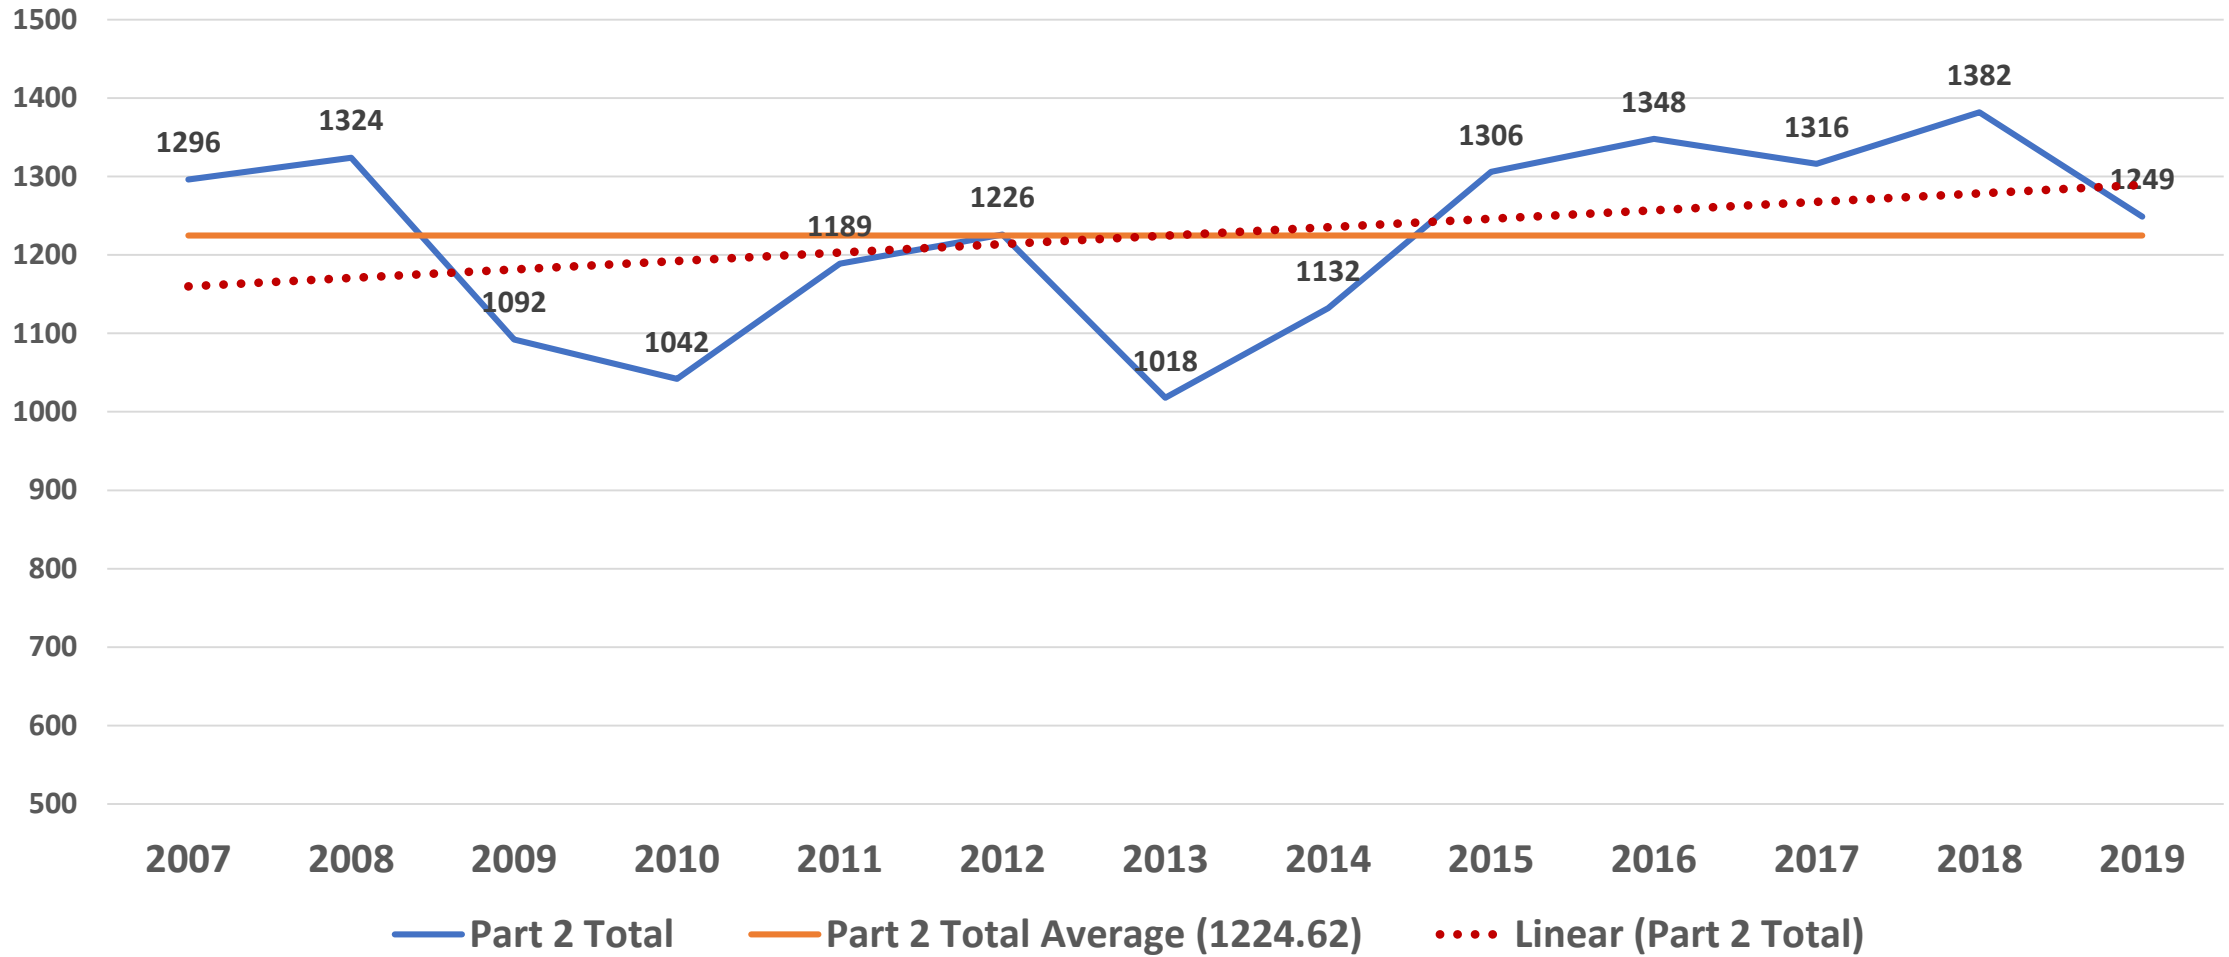

Average = Total amount of crime incidents (23,048) divided by total number of years (13) = 1772.9231

Note: Though you can't have a percentage of a crime, we chose not to round up or down to whole numbers for accuracy/transparency sake. E.g. Homicide average is 0.38 or approximately 1 homicide every 3 years. Rounding up to 1 or rounding down to 0 are both inaccurate.
