

Program Safety Sheet

PROGRAM NAME: Tap for Older Adults

Program Supervisor: Carrie Anderson, 651-792-7106, carrie.anderson@cityofroseville.com

It is important to note that all Roseville Parks and Recreation programs have been planned, developed and conducted following the Center for Disease Control (CDC) and MDH guidelines for Social Distancing in Recreational Programs. Please be aware there is some risk of participating in any activity during the pandemic. Even though we are working to provide as safe an environment as possible, 100% mitigation cannot be guaranteed for any activity.

Program has been modified:

- Tap Dancing will limit the number of registered participants to ensure social distancing can be practiced in the studio. There will be taped squares on the dance floor. Dancers will be instructed to stay within their square a majority of the program.
- No accessories will be used in classes that cannot be easily cleaned and disinfected.
- No shoe cubbies will be used. Dancers will be asked to come in dance shoes, if possible.

Arrival and Departure Information:

- Please show up no more than 5 minutes prior to your class beginning. Instructors will be disinfecting between classes and will need time to prep the studio.
- Upon arrival, instructor will ask participant if they have been screened for COVID-19 symptoms and if any symptoms exist.
- Participants should depart the studio immediately after the program concludes.

Spectator Information:

- The studio has a capacity of 10 people total including instructors. Due to this limit, we request no spectators attend tap dancing.

Basic Cleaning Information:

- Disinfect high touch surfaces before class, in between classes, and end of day

Facial Covering Information:

Per Executive Order 20-81, face coverings are required in indoor facilities and will apply to dance instructors as well as when entering and exiting the facility. Dancers are encouraged to wear a mask, however, they may temporarily remove masks when participating in organized sports where the level of exertion makes wearing a face covering difficult.
