April 7, 2025

City of Roseville, MN

To whom it may concern,

Attached is the USDA, Wildlife Service's harvest report for the City of Roseville 2024-25 deer control project. A copy of this report was also provided to the Minnesota Department of Natural Resources (MNDNR).

A total of 19 deer were removed from within the city at each of the following sites: Western Ave. N., Harriet Alexander Nature Center, and Reservoir Woods. Deer were active at each of the sites throughout the permitted removal period and the city seems to have a high overall deer population.

All deer removed were field dressed and donated for human consumption to needy individuals in the metro area.

Please call or e-mail with additional questions.

Thank you,

Ben Welinski

Deer Disposition from City of Roseville Winter 2024-25 Deer Project

General Observations:

Removal of adult female deer continues to be the priority for this project as female deer are the drivers of the population. Oddly, the removal sites this year attracted a disproportionate number of adult males and as such, they were the only age and sex represented in the harvest. This could be explained by the repeated removal of deer from these sites over the years which has created available habitat for dispersing males to inhabit. However, the harvest consisting of only adult males would not be expected to be repeated in future efforts.
